Superteam India | SIH Winner | Solana Foundation Grant Recipient

Professional Summary

Solana program engineer focused on designing secure, production-grade on-chain programs using Rust and Anchor. Built and deployed three Solana programs to devnet including a freelance escrow protocol, an encrypted on-chain messenger, and an NFT marketplace. Received a \$5,000 Solana Foundation Grant for LearnSol, an education platform helping developers build on Solana, used by 1000+ developers and featured in Colosseum Codex. Strong understanding of PDAs, CPIs, secure account validation, program architecture, and end-to-end testing.

Key Achievements

- Built and deployed three live Solana programs with full Anchor-based testing coverage
- Designed freelance escrow protocol enabling secure milestone-based payments on-chain
- Developed an end-to-end encrypted Solana messenger storing only encrypted payloads on-chain
- Built LearnSol, a Solana developer learning platform funded by Solana Foundation (\$5,000 grant)
- Platform reached 1000+ users, 100+ registered learners, 40+ GitHub stars, 25k+ launch impressions

Technical Skills

Blockchain: Rust, Anchor 0.31+, Solana Runtime, PDAs, CPIs, account constraints, SPL Token

Software: TypeScript, Node.js, Next.js 15, React, PostgreSQL (Drizzle ORM), Redis

DevOps: AWS ECS Fargate, Docker, CI/CD, distributed systems fundamentals

Solana Programs (Deployed on Devnet & Live)

Pigeon — End-to-End Encrypted Messenger.....

Stack: Rust, Anchor, X25519, ChaCha20-Poly1305, Next.js

Live: pigeon.raghav.codes

GitHub: [Repository](#) | [Demo](#)

- Stores only encrypted messages on-chain
- Uses X25519 + HKDF + ChaCha20-Poly1305 for encryption
- PDA-based chat account architecture
- Real-time updates via WebSocket subscriptions

Freelance Escrow Protocol.....

Stack: Rust, Anchor, Solana, SPL Token

Live: escrowprotocol.raghav.codes

Devnet: 3PW0WeSxThLbCFGxMAMspsCqrFJJhbdvZg4DVRpdu1y

GitHub: [Repository](#)

- Deterministic PDA-based escrow accounts
- State machine: Pending → Funded → Submitted → Approved → Complete

- Instructions: Initialize, Fund, Submit, Approve, Withdraw, Refund
- Full Anchor test coverage

PixelMart — NFT Marketplace.....

Stack: Rust, Anchor, TypeScript

Live: pixelmart.raghav.codes

GitHub: [Repository](#)

- PDA vault custody for NFTs
- Listings, direct sales, auctions, marketplace fees
- Secure ownership validation and reentrancy-safe flow

Developer Education

LearnSol — Solana Foundation Grant Recipient.....

Stack: TypeScript, Rust, Anchor, Next.js, PostgreSQL

Links: [Website](#) | [GitHub](#)

Funding: \$5,000 Solana Foundation Grant

Recognition: Featured in Colosseum Codex Newsletter

Metrics: 1000+ users, 100+ accounts, 40+ GitHub stars, 25k+ impressions

- Full Solana learning path: Solana basics → Rust → Anchor → DeFi
- AI-tutor with pgvector RAG
- Hands-on devnet exercises and gamified learning

Experience

LearnSolana

Founder

Remote

July 2025 – Present

- Built full platform: backend, frontend, infra, learning curriculum
- Secured Solana Foundation grant funding of \$5,000
- Leading roadmap, feature development, and developer community

FOSSEE, IIT Bombay

Software Engineering Intern

Remote

Feb 2025 – May 2025

- Built Django backend modules for structural engineering workflows
- Developed React interfaces for 3D visualization

Debales AI

Software Engineering Intern

Remote (USA)

Jul 2024 – Sep 2024

- Built beautiful Chatbot UIs improving user engagement by 20%
- Added persistent chat session storage to increase usage by 15%
- Integrated media support into chatbot system
- Integrated chat feedback system to significantly improve AI responses

Recognition

Solana Foundation Grant Recipient (\$5,000)

Featured in Colosseum Codex

Smart India Hackathon 2024 Winner

Superteam India Contributor

Education

Gurugram University
B.Tech Computer Science

India
2022 – 2026
