PROFESSIONAL SUMMARY

Solana engineer who likes building production-grade on-chain protocols using Rust and Anchor. Awarded **\$5,000 Solana Foundation Grant** for LearnSol, an education platform serving 1,000+ developers with 96% answer accuracy. Deployed multiple protocols to devnet including encrypted messenger, escrow protocol and zk-swap AMMs to name a few. Featured in **Colosseum Codex Newsletter** for contributions. Expertise in PDAs, CPIs, DeFi protocols, and plugging protocols with backend infrastructure.

TECHNICAL SKILLS

Crypto: Solana, Anchor Framework 0.32+, Rust, Noir-Lang, ZK-Proofs

Languages: Rust, TypeScript, Noir-Lang, Python

Frontend: Next.js, TailwindCSS, WebSockets, WebRTC

Backend: Node.js, Express, Django, RESTful APIs

Databases: PostgreSQL (Drizzle ORM), Redis Pub/Sub, pgvector (RAG)

DevOps: AWS (ECS Fargate, S3, EC2), Docker, CI/CD Pipelines, Microservices Architecture

EXPERIENCE

Founder & Lead Developer

Oct 2024 – Jan 2026

LearnSol (Solana Foundation Grant Recipient)

Remote

- Awarded **\$5,000 grant by Solana Foundation** to build comprehensive developer education platform
- Architected full-stack platform serving 1,200+ users with AI bot achieving 96% accuracy on Solana/Rust/Anchor queries
- Engineered RAG pipeline ingesting 100+ documentation pages using pgvector, enabling context-aware learning assistance
- Built interactive coding sandbox with real-time Rust/Anchor compilation, currently 1100+ questions solved with 0 bugs
- Featured in **Colosseum Codex Newsletter** for advancing Solana developer education and ecosystem growth
- Designed complete curriculum: Solana fundamentals → Rust → Anchor → DeFi → Full-stack dApp development

Software Engineering Intern

Feb 2025 – June 2025

FOSSEE, IIT Bombay

Remote

- Architected Django RESTful APIs for structural steel calculations in Osdag, serving 2,000+ civil engineers
- Engineered React-based 3D CAD visualization interfaces rendering real-time engineering computations
- Implemented persistent session management enabling engineers to resume complex 50+ step design workflows
- Deployed Dockerized microservices with CI/CD pipelines, reducing deployment time by 40%

Software Engineering Intern

July 2024 – Sept 2024

Debales AI

Katy, Texas, USA (Remote)

- Built dynamic data visualization components processing 10,000+ AI-generated product insights, driving 20% engagement increase
- Built session-based chat persistence system handling 500+ daily conversations with zero data loss
- Optimized product image rendering via CDN integration, increasing load times by 20% and boosting user interaction by 10%
- Engineered analytics-driven feedback system collecting 1,200+ user ratings, enabling 15% model accuracy improvements
- Resolved critical production issues affecting 5,000+ users, increasing satisfaction scores from 3.5 to 4.2/5

SOLANA PROTOCOLS & DAPPS

Shadow DEX | *Rust, Anchor, Noir, Sunspot, Next.js* | Code

- Built zero-knowledge gated DEX on Solana devnet enabling privacy-preserving eligibility verification for token swaps
- Engineered four ZK proof circuits using Noir: minimum balance, token holder, blacklist exclusion, and shielded spend proofs
- Architected on-chain shielded spend proof verification with off-chain relayer validation for eligibility requirements
- Implemented automated swap flow processing 4 proof types with real-time verification and AMM execution logic

Pigeon - Encrypted Messenger | *Rust, Anchor, X25519, ChaCha20-Poly1305* | Code

- Deployed end-to-end encrypted on-chain messenger to Solana devnet with zero plaintext storage
- Architected PDA-based chat accounts storing encrypted message payloads with X25519 key exchange and ChaCha20-Poly1305 AEAD
- Implemented wallet signature-based key derivation using HKDF, eliminating manual key management
- Built real-time message delivery system via WebSocket account subscriptions for instant encrypted communication

SafeProtocol | *Rust, Anchor, SPL Token* | Code

- Developed automated escrow smart contract on Solana devnet (program ID: 3PW0WeSxThLbCFGxMAMspsCqrFJJhbdvZg4DVrPdu1y)
- Designed state machine with 5 transaction stages: Pending → Funded → Work Submitted → Approved → Complete
- Implemented PDA-based escrow accounts with deterministic address derivation for secure fund custody
- Built comprehensive test suite covering initialization, funding, submission, approval, withdrawal, and refund scenarios

ADDITIONAL PROJECTS

EzDeploy | *Next.js, TypeScript, AWS ECS, Redis, PostgreSQL* | Live | Code

- Architected production-grade Platform-as-a-Service automating deployment of 100+ applications with 99.9% uptime
- Engineered AWS ECS Fargate orchestration with S3 asset delivery and Redis pub/sub, processing 50+ concurrent builds
- Implemented secure multi-tenant architecture with PostgreSQL, Better-Auth JWT, and Drizzle ORM supporting 200+ users
- Built containerized CI/CD pipeline with WebSocket streaming, delivering real-time build logs at 100ms latency

ResumeMax | *MERN Stack, OpenAI GPT-4, TailwindCSS* | Live | Code

- Developed AI-powered resume optimization platform generating tailored content for 800+ job seekers using GPT-4
- Architected version control system managing 3,000+ resume variants with role-specific keyword optimization
- Engineered context-aware cover letter generator leveraging job description analysis and ATS keyword matching
- Designed ATS-optimized templates achieving 90%+ parsing accuracy across 15+ applicant tracking systems

TECHNICAL WRITING

Solana Development Blog: Published technical articles on Medium with 25,000+ impressions covering Solana architecture, hardware acceleration, parallel execution, and developer best practices. Topics include GPU/hardware integration, developer onboarding strategies, and building effective learning paths for blockchain engineers.

EDUCATION

Dronacharya College of Engineering
Bachelor of Engineering in Computer Science

Gurugram, Haryana, IN
Oct 2022 – Present

RECOGNITION & ACHIEVEMENTS

Solana Foundation Grant – \$5,000 funding for LearnSolana platform (Top 2% selection from 250+ submissions)
Colosseum Codex Feature – Highlighted in official newsletter for contributions to Solana developer education
Smart India Hackathon 2024 Winner – 1st Position as Team Leader (Top 0.375% from 80,000+ teams nationwide)
Superteam India Member – Active contributor to Solana ecosystem growth and community initiatives
NES Innovation Awards 2024 – Top 50 Project Ideas (Selected from 800+ submissions)
IIT Bombay FOSSEE Internship – Competitive selection from 3,000+ applicants (Top 5% acceptance rate)
